

KARTHICK T

Angular Developer | Frontend Developer

Angular Developer | 3+ Years | TypeScript | RxJS | GCC On-Site Experience

☎ +91 8220127752 | ✉ karthickt0201@gmail.com | 💼 linkedin.com/in/karthick-t-085563236

PROFESSIONAL SUMMARY

Angular Developer with 3+ years of experience building scalable, responsive web applications in the healthcare insurance domain. Proficient in Angular (v14–v18), TypeScript, RxJS, REST API integration, Reactive Forms, and performance optimization using lazy loading. Delivered production-grade modules for Qatar Health Insurance System (QHIS) serving 3,000+ users across hospital and insurance portals. Worked on-site in the GCC region for 3 months. Experienced in cross-functional Agile teams of 50+ members.

TECHNICAL SKILLS

Frontend: Angular 14 / 15 / 16 / 17 / 18, TypeScript, JavaScript, RxJS, NgRx / State Management, Angular Material, Angular CLI, Reactive Forms, Template-driven Forms, HTTP Client, Component Architecture, HTML5, CSS3, SCSS, Bootstrap, RESTful API Integration

Languages: MySQL,

Tools: Git, Bitbucket, VS Code, IntelliJ IDEA, DBeaver, Figma, NPM, Codeium

Productivity: ChatGPT, DeepSeek, Claude

Practices: Agile Methodology, Cross-functional Team Collaboration

PROFESSIONAL EXPERIENCE

Software Engineer | IHX Cloud Private Limited | Kundhalahalli, Bangalore – 560037 | May 2023 – Present

Project 1: Qatar Health Insurance System (QHIS)

A real-time insurance eligibility verification system enabling hospital staff to instantly verify patient insurance coverage. Verification requests are auto-routed to insurance companies who respond with policy status, coverage limits, and eligibility — eliminating manual checks before treatment.

- **3,000+ users** served across hospital and insurance portals in the GCC region.
- **50-member cross-functional Agile team** — coordinated with backend developers, QA, and business analysts.
- **8+ Angular modules** built end-to-end including eligibility verification, policy creation, and claims workflows.
- Built responsive web pages using **Angular, TypeScript, SCSS, and Bootstrap** — ensuring seamless cross-device UX for hospital and insurance portals.
- Designed **reusable Angular components** — dynamic forms, data grids, authentication widgets, and policy status cards — improving development efficiency by ~30%.
- Integrated **RESTful APIs** for complex screens: eligibility requests, coverage responses, and policy validation workflows.
- Implemented **product creation functionality** — allowing insurance companies to define multiple products (Gold, Silver, Premium) with configurable coverage limits.
- Handled **dynamic eligibility rules** based on policy status, coverage limits, and patient policy expiration.

On-Site Experience (GCC)

- Worked on-site in the **GCC region for 3 months** — collaborating directly with hospital administrators, insurance stakeholders, and end-users to gather requirements, demonstrate features, and resolve critical production issues — gaining hands-on exposure to regional healthcare compliance standards including patient data privacy norms and real-time system integration in a medical environment.

Project 2: QCHIS – Quadracyte Health Insurance Project

*Developed a comprehensive insurance platform for hospitals, encompassing a total of **23 product modules** including **Ambulatory Care**, **Patient Care**, **Pharmacy**, and others. The system streamlined insurance claim processing, product configuration, and service delivery for healthcare providers. Responsibilities included building reusable UI components with Angular Material, and ensuring responsive design with SCSS/CSS.*

- Developed **static and dynamic modules** for patient registration, insurance claims, and medical test management using Angular and SCSS.
- **Enhanced UX** with smooth animations and transitions — ensuring cross-browser compatibility and responsive design.
- **Optimized performance**, reducing load times by 20% through lazy loading and optimized data handling.

EDUCATION

Bachelor of Science in Computer Science

Manonmaniam Sundaranar University, Nazareth Margoschis College, Pillaiyanmani | 2019 – 2022 | **CGPA: 90%**

CERTIFICATIONS

Full Stack Web Development Course | Acme InfoTech | Nov 2019 – Apr 2020

- Covered Angular, JavaScript, Node.js, and databases with hands-on projects.
